

How to Sign In

A step-by-step walkthrough of the sign-in screen for Luna's POS — Ilonggo Legacy.

login.php – staff and admin access

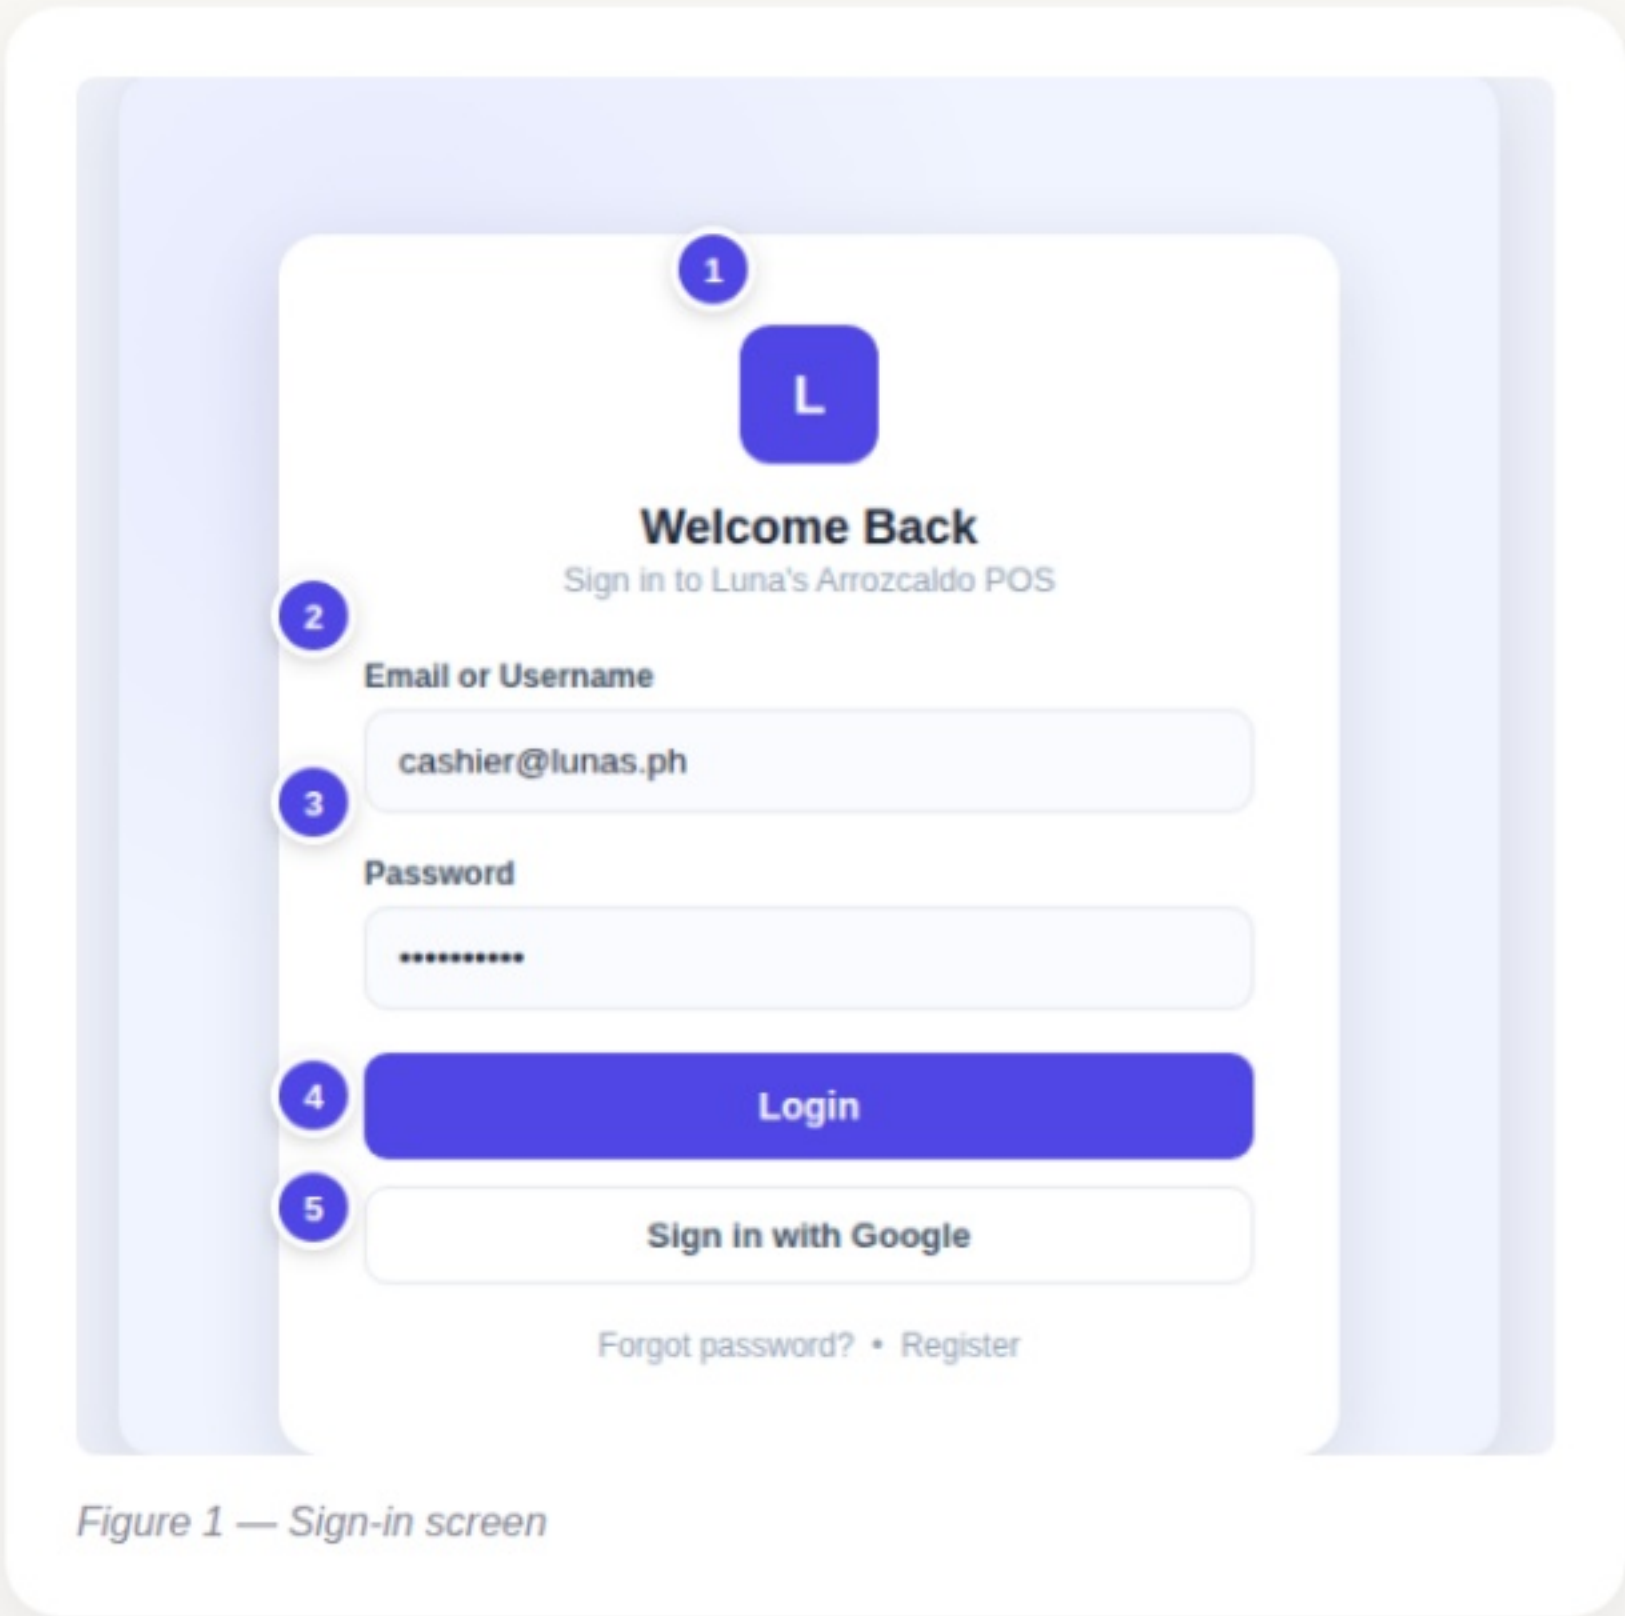

Figure 1 — Sign-in screen

Screen Guide

- 1 Branch logo** — Confirms which Luna's Arrozcaldo branch you're logging into.
- 2 Email or Username field** — Enter the staff or admin account issued to you.
- 3 Password field** — Enter your password. Use "Forgot password?" below if locked out.
- 4 Login button** — Signs you in and routes you to the Dashboard (admin) or POS Terminal (staff).
- 5 Sign in with Google** — Optional one-tap login via Google OAuth, set up per GOOGLE_SETUP.md.

How to Use the Dashboard

A visual guide to the Dashboard — your daily performance snapshot the moment you log in.

dashboard.php — daily performance at a glance

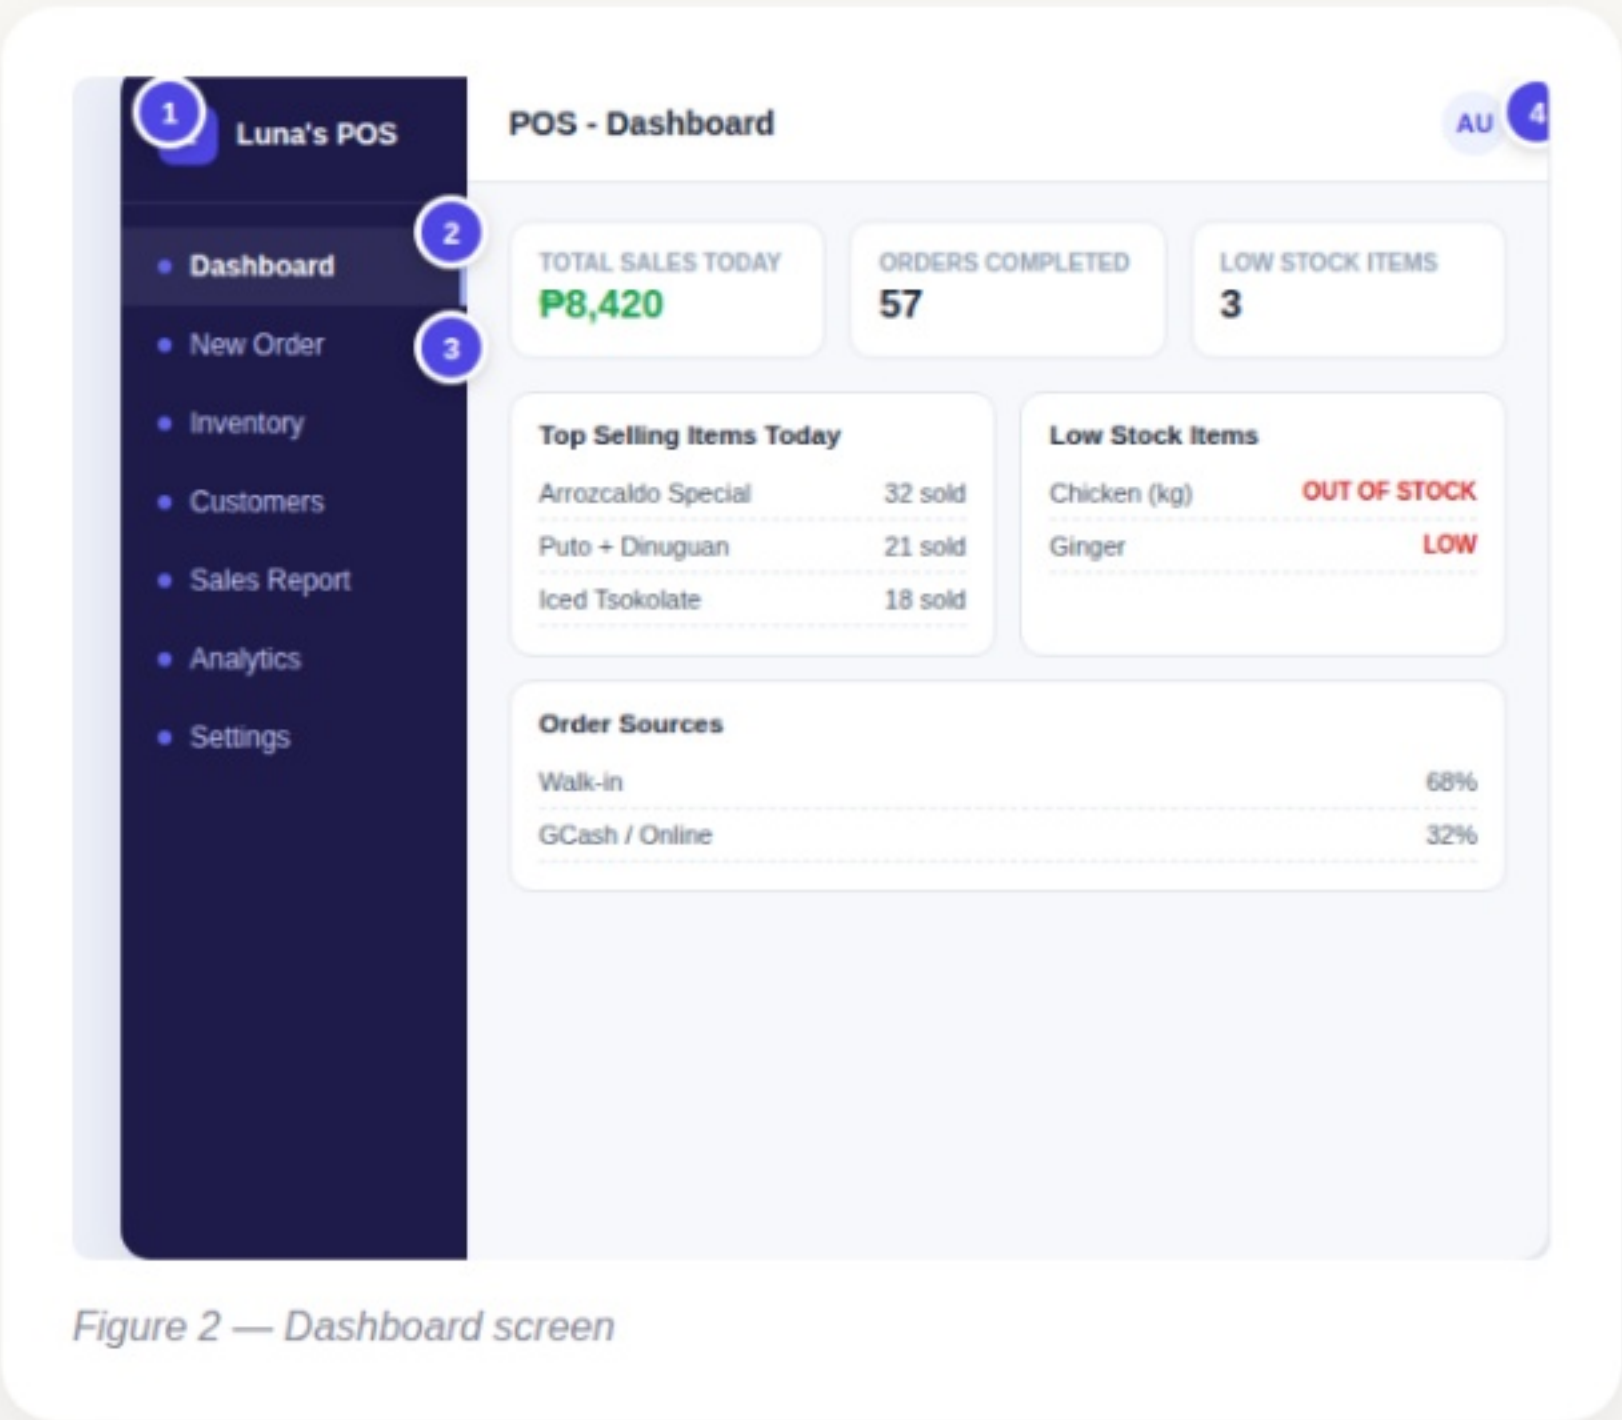

Figure 2 — Dashboard screen

Screen Guide

- 1 **Sidebar navigation** — Jump between Dashboard, New Order, Inventory, Customers, Sales Report, Analytics, and Settings.
- 2 **KPI cards** — Total Sales Today, Orders Completed, and Low Stock Items refresh in real time.
- 3 **Top Selling Items / Low Stock panels** — Spot best-sellers and items needing restock at a glance.
- 4 **Account menu** — Shows the logged-in user (e.g. Admin User) and the sign-out option.

How to Take an Order

A visual guide to the POS Terminal — ring up a sale from start to payment.

pos_terminal.php – ring up a sale from start to payment

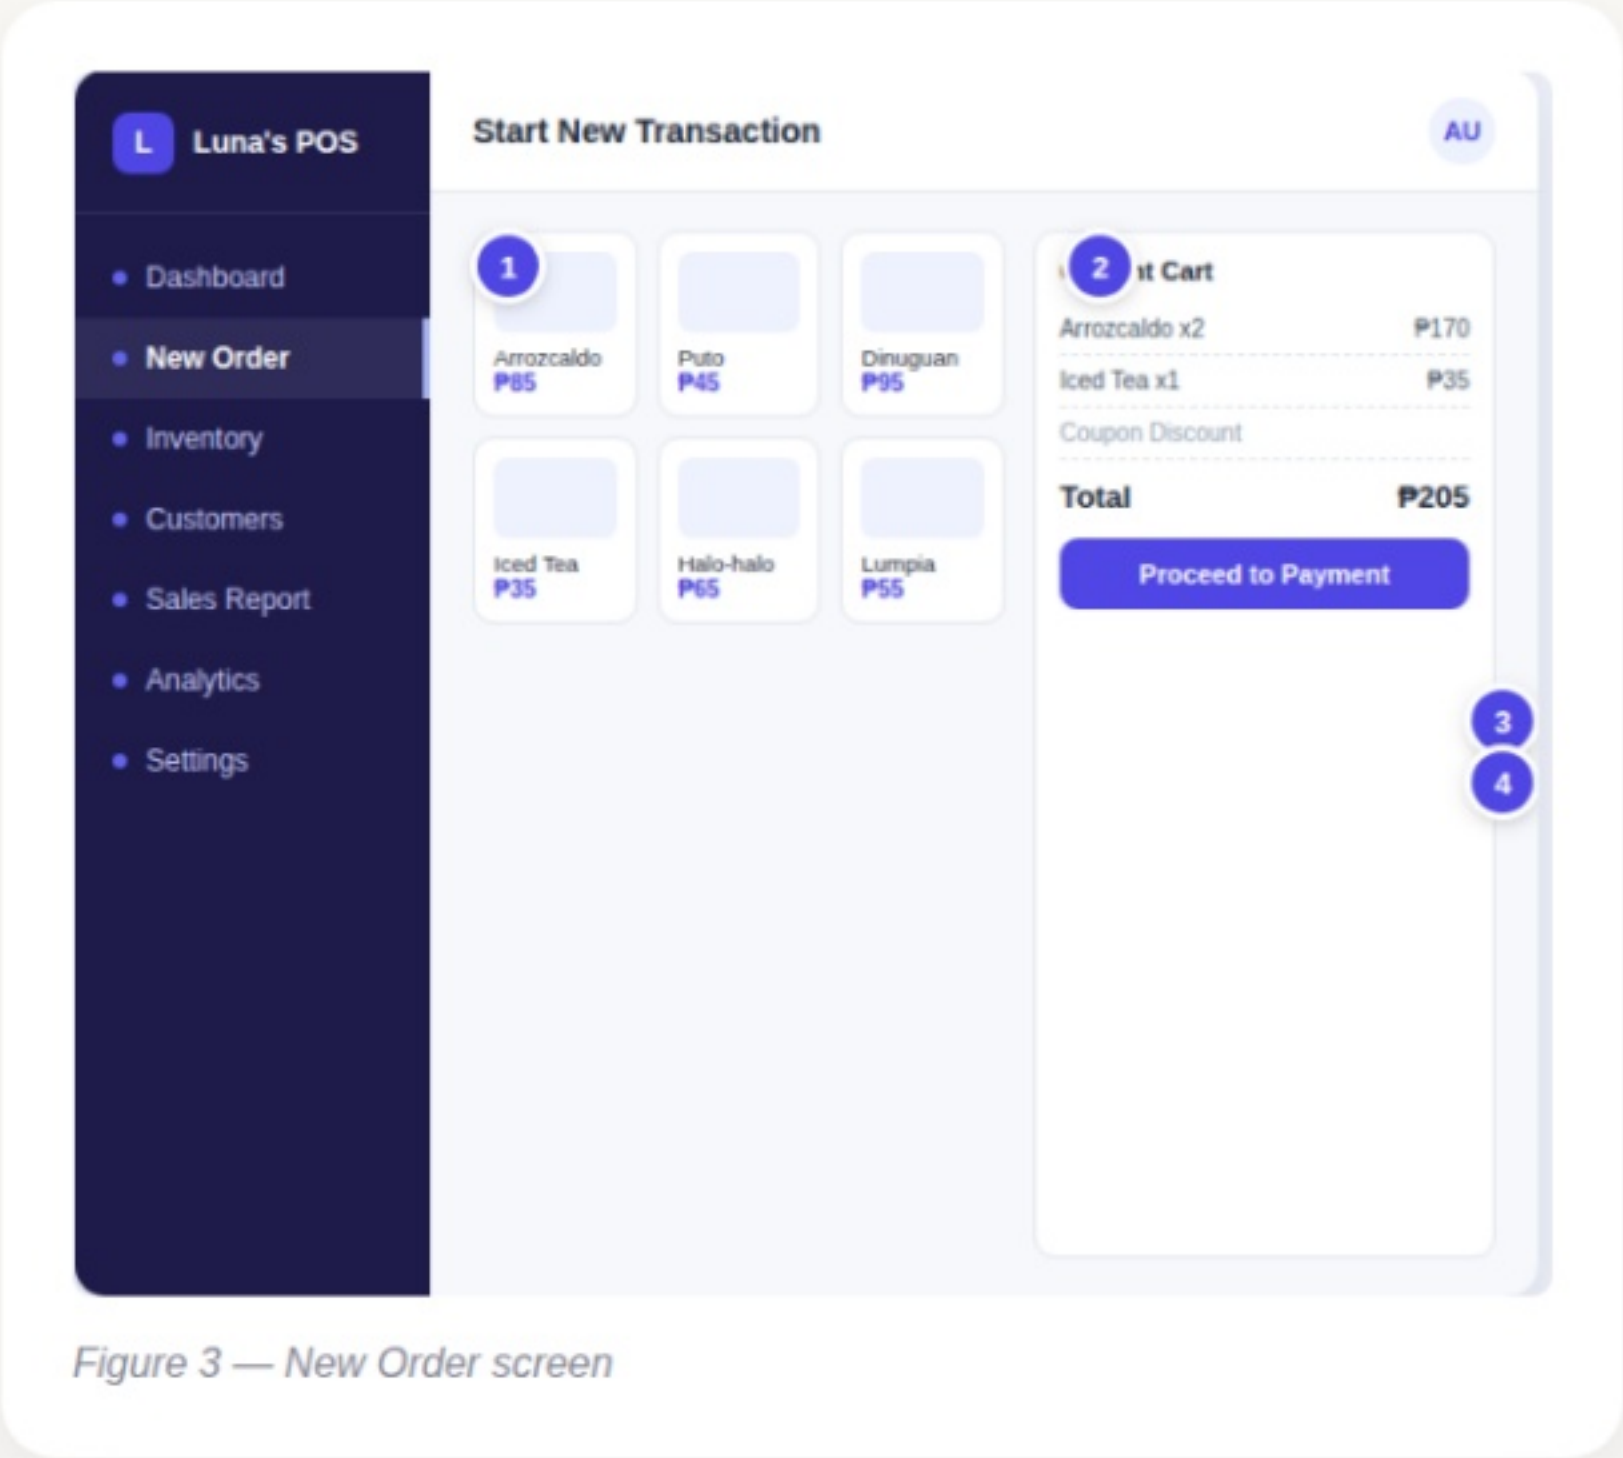

Figure 3 — New Order screen

Screen Guide

- 1 **Menu grid** — Tap any product to add it to the cart; out-of-stock items are flagged automatically.
- 2 **Current Cart** — A running list of items, quantities, and an optional coupon discount.
- 3 **Total** — Subtotal plus discount, calculated live as items are added.
- 4 **Proceed to Payment** — Opens the payment method screen: Cash, GCash (Pay QR / GCash app), or Pay at counter.

How to Manage Inventory

A visual guide to Inventory — stock levels and the product catalog.
inventory.php – stock levels and product catalog

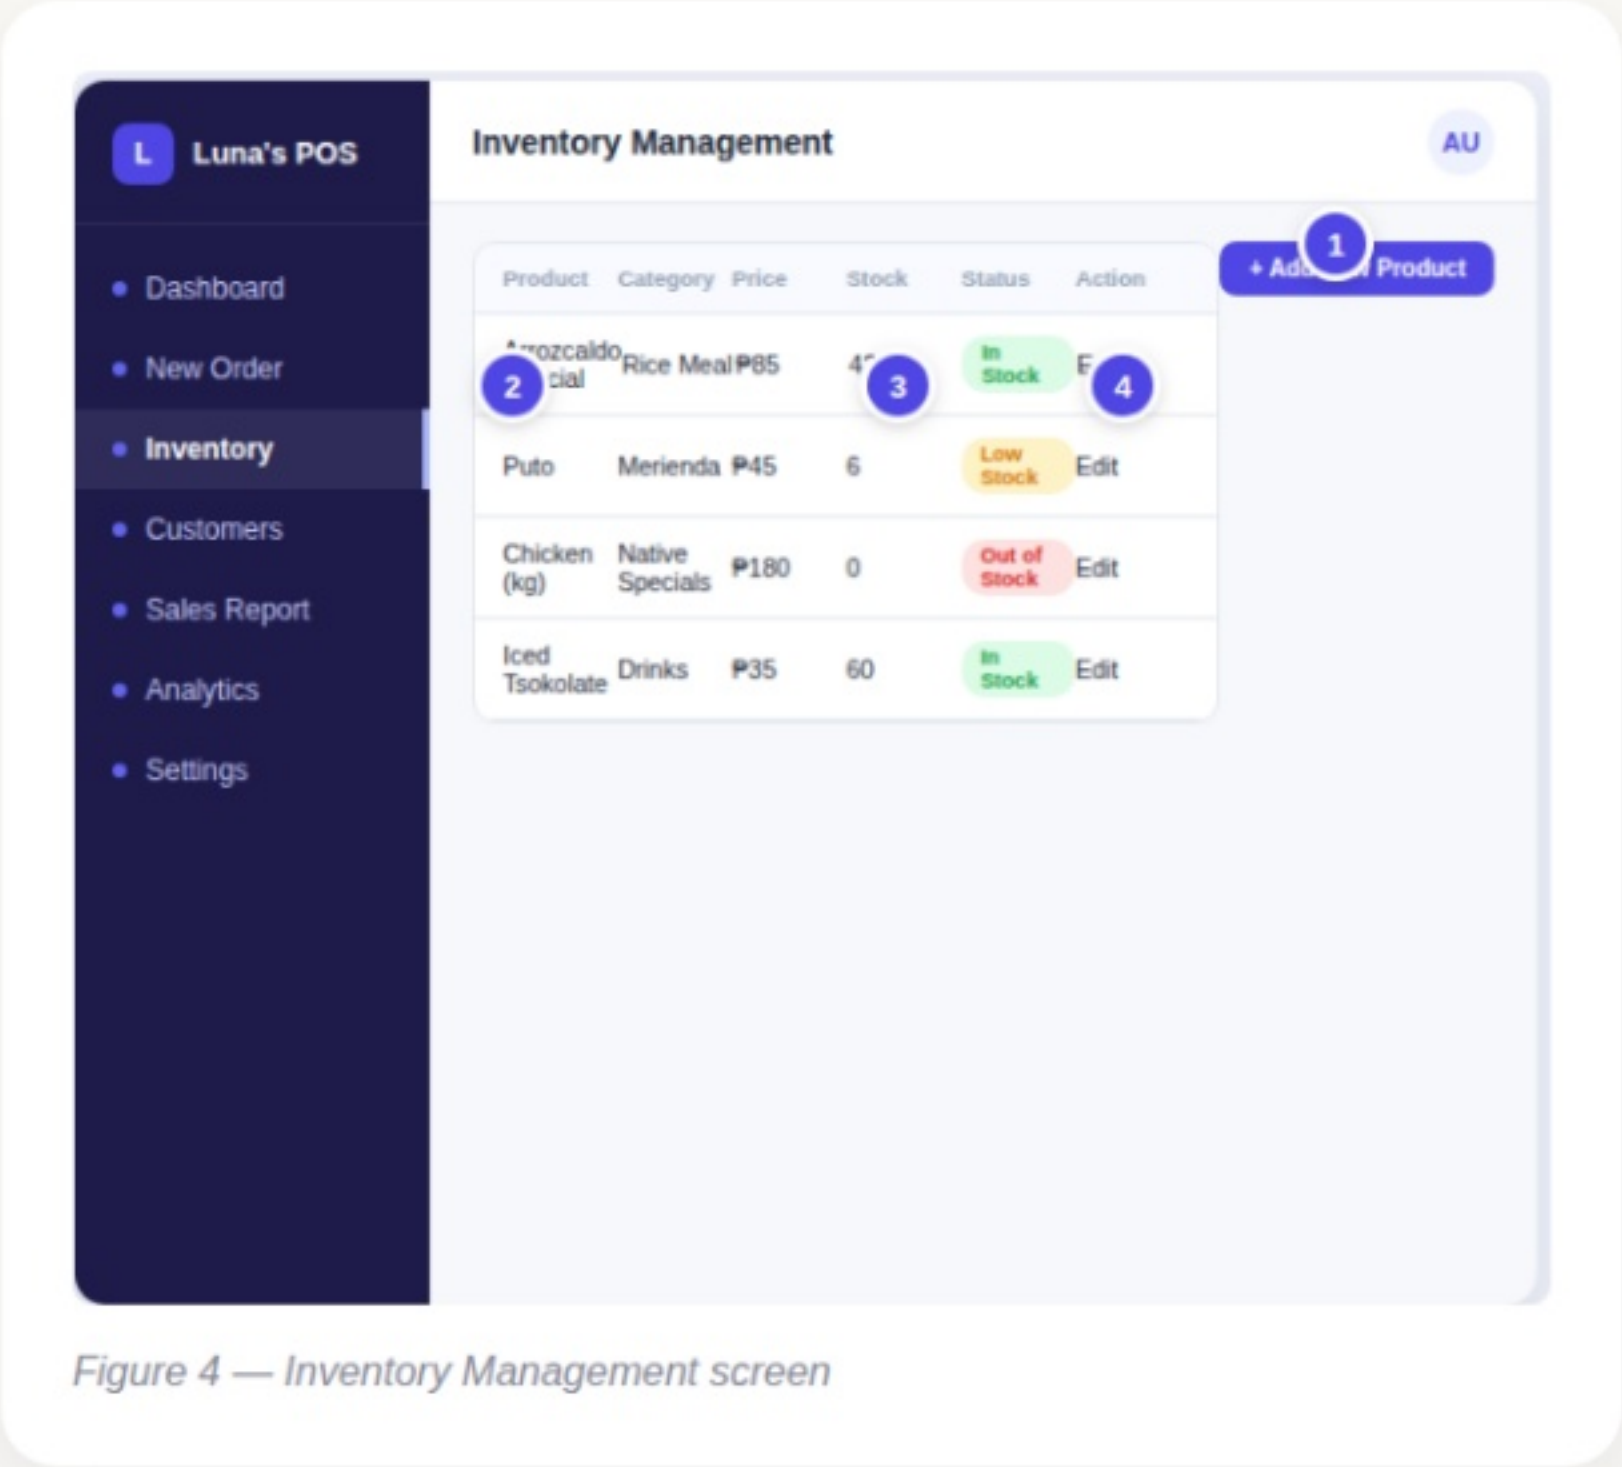

Figure 4 — Inventory Management screen

Screen Guide

- 1 Add New Product** — Opens a form for Product Name, Category, Price, Initial Stock, and a Product Image.
- 2 Category column** — Products are grouped as Rice Meal, Merienda, Native Specials, Desserts, or Drinks.
- 3 Stock column** — Current on-hand quantity per product.
- 4 Status pill** — Auto-flags items as In Stock, Low Stock, or Out of Stock so restocking is easy to spot.

How to View Order History

A visual guide to Customers — search past orders and view receipts.
customer.php — search past orders and view receipts

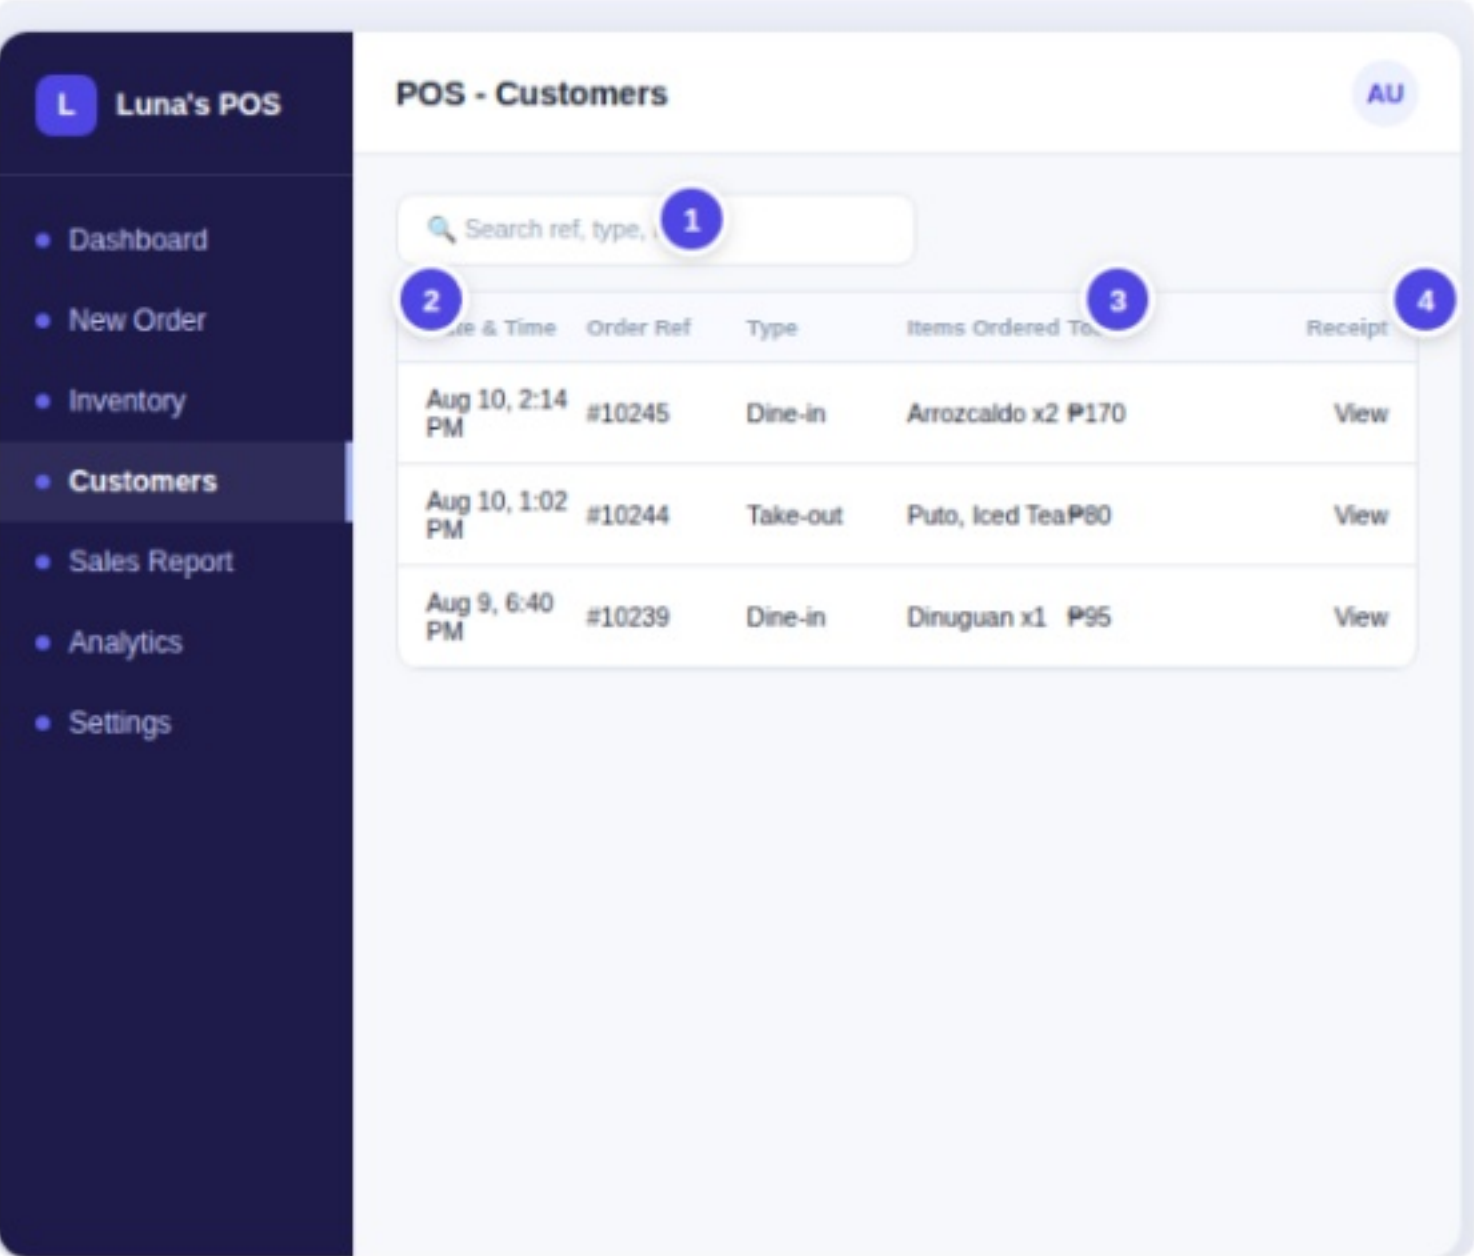

Figure 5 — POS Customers screen

Screen Guide

- 1 **Search bar** — Filter by order ref, order type, or item name.
- 2 **Order Ref & Type** — Unique order number and whether it was Dine-in or Take-out.
- 3 **Items Ordered & Total** — A quick summary of what was bought and the amount paid.
- 4 **View Receipt** — Opens the full receipt: Subtotal, Discount, and TOTAL breakdown.

How to Read the Sales Report

A visual guide to the Sales Report — daily revenue, discounts, and transactions.

salesreport.php — daily revenue, discounts, and transactions

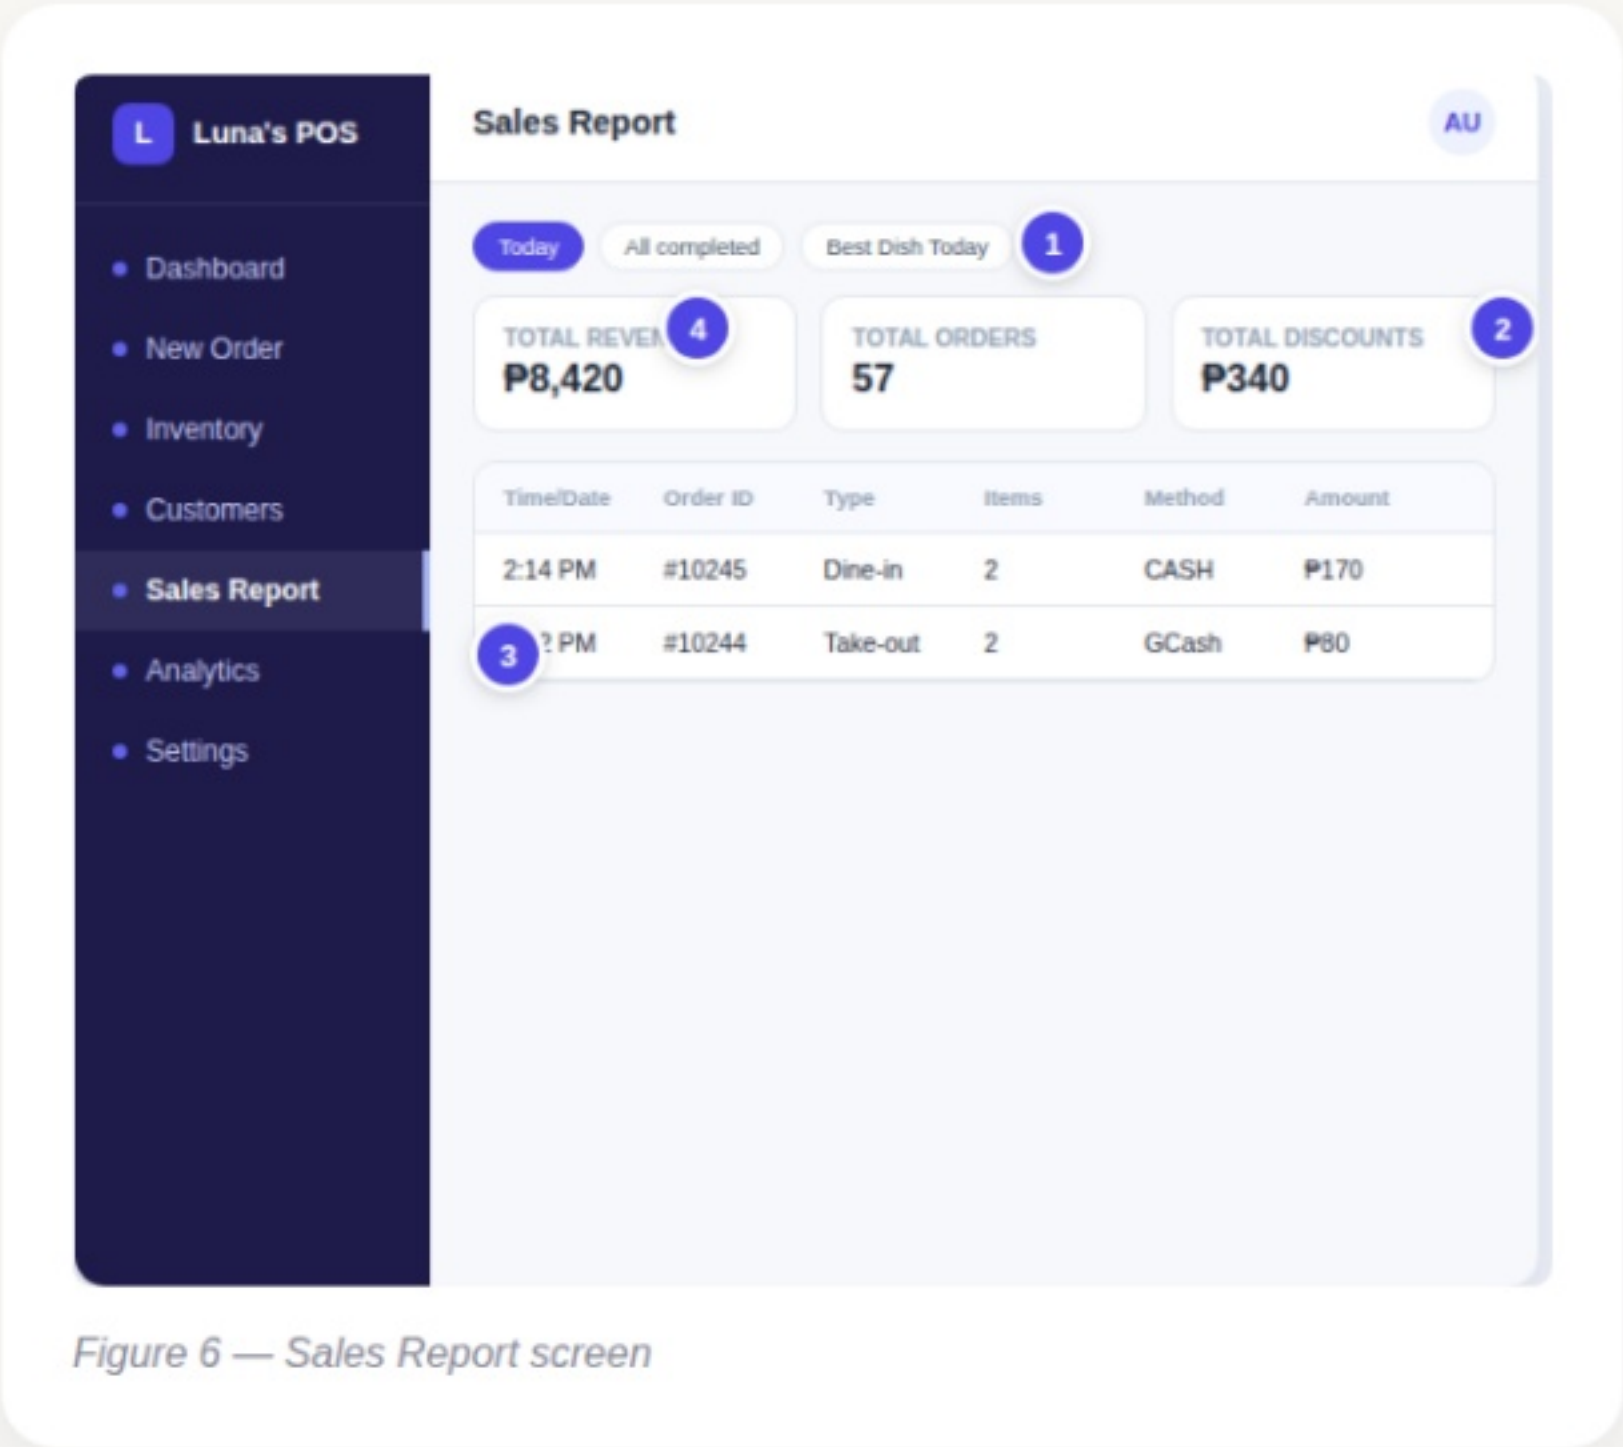

Figure 6 — Sales Report screen

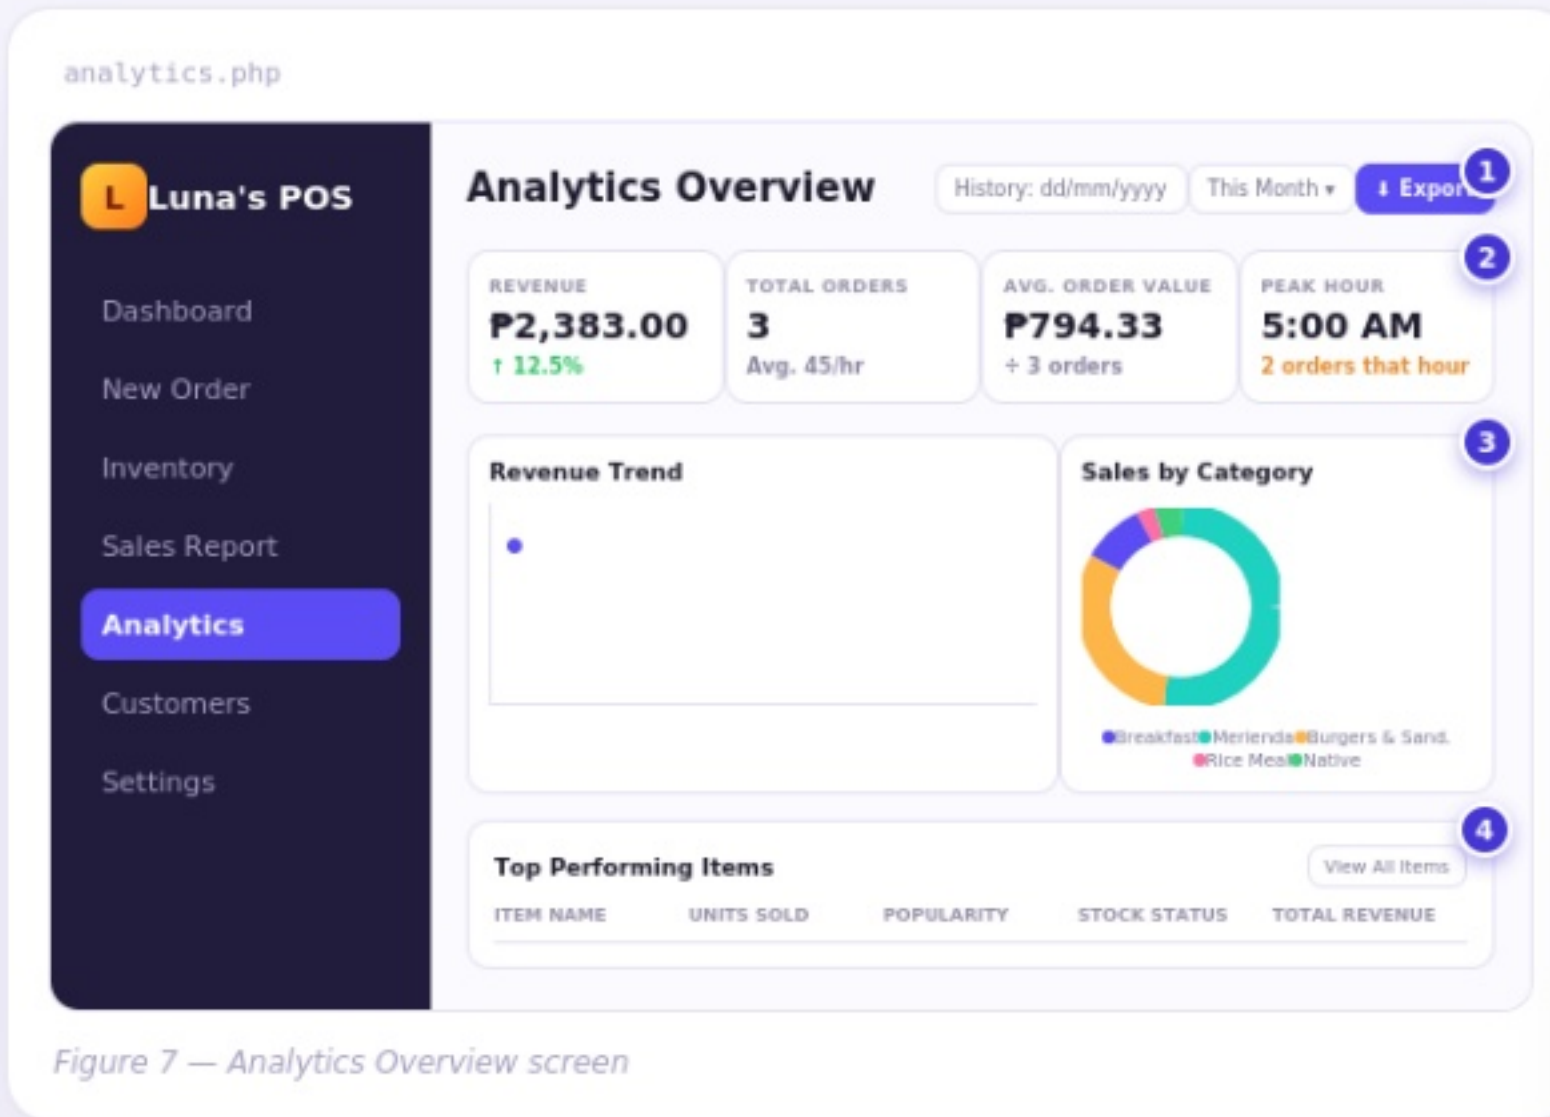

Screen Guide

- 1 **Date filter pills** — Switch between Today, All completed, or the day's Best Dish.
- 2 **Summary cards** — Total Revenue, Total Orders, and Total Discounts and coupons applied.
- 3 **Transaction table** — Every order's Time/Date, Order ID, Type, item count, and payment Method.
- 4 **Amount column** — Final amount collected per transaction, used to reconcile the till.

How to Use Analytics

A visual guide to the Analytics Overview — revenue, orders, trends, and top items.

analytics.php — revenue, orders, trend, and category breakdown

Screen Guide

- 1 Date range controls** — pick a custom date with History, or switch the quick range (This Month) to reshape every card and chart below. Export downloads the current view.
- 2 Summary cards** — Revenue, Total Orders, Avg. Order Value, and Peak Hour for the selected period, each with a quick comparison underneath (e.g. ↑12.5%, orders/hr).
- 3 Revenue Trend & Sales by Category** — the line chart tracks revenue day by day, while the donut breaks sales down by menu category (Breakfast, Merienda, Burgers & Sandwiches, Rice Meal, Native, Dessert, Drinks). Hover any slice for its share.
- 4 Top Performing Items** — ranks items by Units Sold and Popularity, with Stock Status and Total Revenue alongside. Tap View All Items for the full list.

How to Manage Account & Settings

A visual guide to Settings — profile, password, and theme.

settings.php – profile, password, and theme

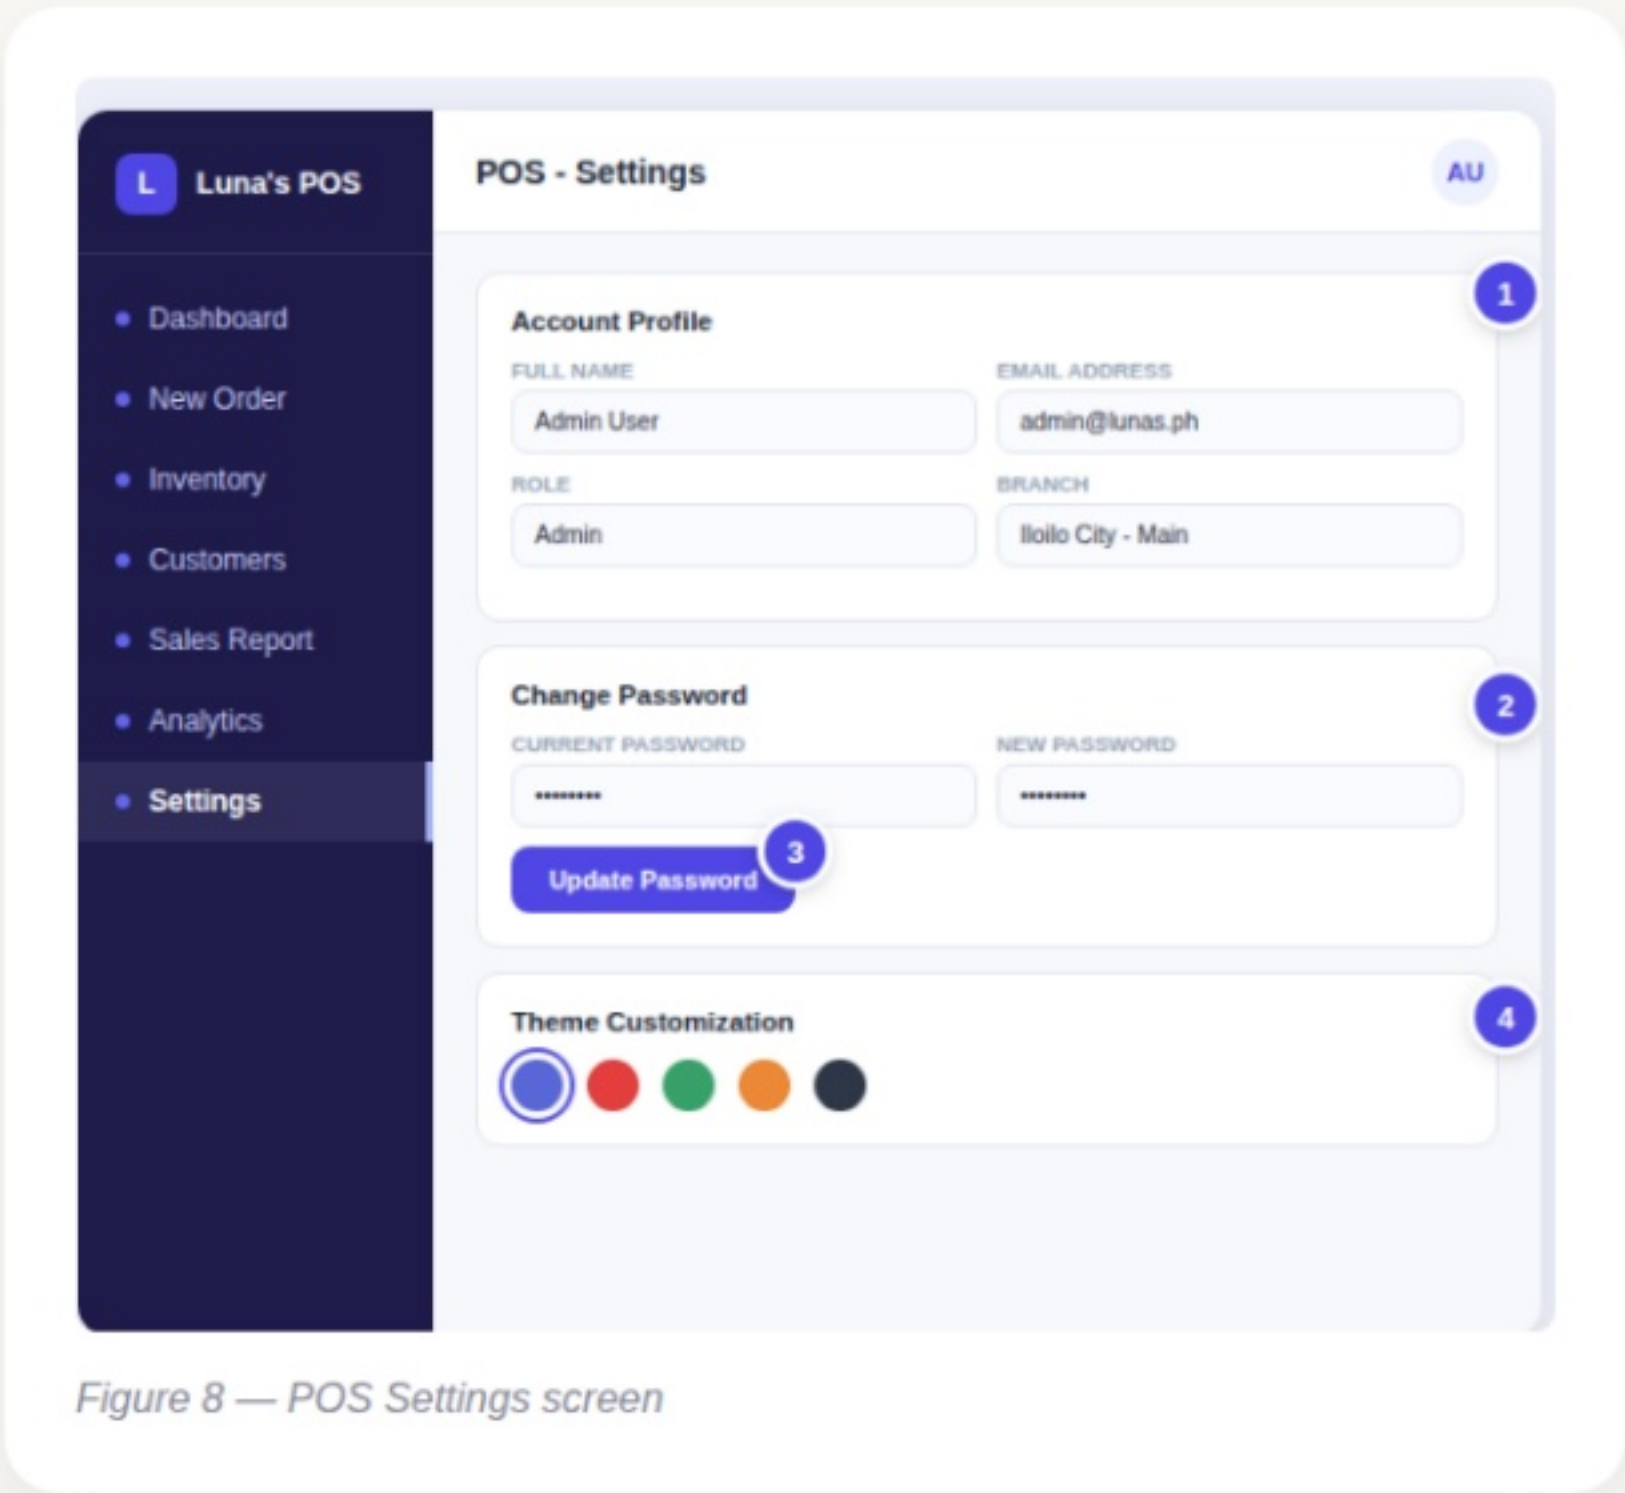

Figure 8 — POS Settings screen

Screen Guide

- 1 **Account Profile** — Full Name, Email Address, Role, and Branch for the logged-in account.
- 2 **Change Password** — Requires the Current Password plus a New Password (min. 8 characters, confirmed twice).
- 3 **Update Password / Save Changes** — Submits the form; validation errors show inline if fields don't match.
- 4 **Theme Customization** — Color swatches instantly recolor the whole POS interface, saved per device.
